HAIRDENSYL COMPLEX

Multi-functional complex for hair volumen

INCI NAME:

Aqua (Water), Soluble collagen, Honey extract, Sodium PCA, Hydrolyzed elastin, Serine, Glycogen

DOSE OF USE:

5-10%

SOLUBILITY:

HYDROSOLUBLE

PRESERVATIVE:

PARABEN FREE

COSMETIC USE:

-Treatments to help to reduce hair loss and stimulate new hair growth
-Preparations for strengthens hair and increases the diameter of thin hairs
-Protection for permanent waved hair
-Shampoos and lotions for devitalized, dry, scaly or weak hair
-Protective hair conditioners
-Preparations to increase the hair Volume

DESCRIPTION:

HAIRDENSYL COMPLEX is a complete marine & botanical multi-functional complex for the care of thin, devitalized and weak hair. Volume for the hair
It is a hair treatment to repair and strengthen the hair structure, supplying the hair with substances for external and internal use to increase its volumen.

- ✓ **Proteins from native marine collagen** for the hair's external protection.
- ✓ **Amino acids from hydrolyzed marine elastin** for internal use to improve the vitality of hair follicles in the scalp.
- ✓ **Polysaccharides and moisturizing factors** extracted from honey extract to improve the hydroretention and hydrocaptation capacity.

Energy source from marine glycogen to stimulate new hair growth.

Damage to the proteins (Collagen and Elastin) in the scalp from sunlight and environmental conditions is affecting to thinning and loss of hair. This is a self-reinforcing problem, because as hair thins and becomes sparser, greater amounts of sunlight, in particular in the UV range of the spectrum, can penetrate to the scalp and damage the proteins in the scalp matrix.

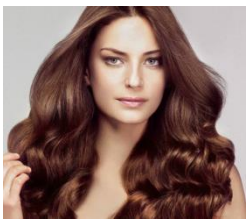
It is a complete active ingredient from which the hair will get substances to nourish, increase its moisture and get external protection against damaging substances.

PROPERTIES:

HAIRDENSYL COMPLEX is indicated to increase the hair volumen.

HAIRDENSYL COMPLEX will also improve the protection of the hair against environmental damages thank to the native collagen **film forming** capability. It can gives to the hair a sensation of softness. Thanks to its hygroscopic feature, it has an important moisturization capacity. It offers to the scalp follicles amino acids and peptides to help increase its proteins synthesis, which decreases with environmental damage, in particular in the UV range of the spectrum Collagen and Elastin are the proteins responsible for structure, protection and moisture of hair.

HAIRDENSYL COMPLEX stimulates the hair's follicle growth.



MULTIFUNTIONAL ACTIVE TO INCREASE HAIR VOLUME:

- ✓ Increasing hair protection and reinforcing the cohesion of the cuticulary scales.
- ✓ Restoring the vitality of hair follicles and preventing from UV penetration.
- ✓ Recovering the energetic reserves of follicle's cells.
- ✓ Stimulating effect on the growth of human hair follicles.
- ✓ Increasing hydration and hair's flexibility.
