

AMINO GLYCO KVIAR PF

Luxury effective
skin care

INCI NAME

Aqua (Water), Glycerin, Glycosaminoglycans, Glycogen, Hydrolyzed Caviar Extract.

DOSE OF USE:

1 % - 5 %

SOLUBILITY

Hydrosoluble

AMINO GLYCO KVIAR PF is a natural marine active ingredient that combines pure Caviar extract, enriched with glycosaminoglycans and glycogen, both of marine origin, combining efficacy, luxury and sophistication.

Caviar is a totally energetic product, highly appreciated for its components: **proteins, minerals and vitamins.**

With aging, there is a progressive reduction in the hydrolipid film, the skin loses its shine and the epidermis becomes thinner.

The GAG content in **AMINO GLYCO KVIAR PF** powerfully moisturizes the surface layers of the skin and its glycogen content provides a source of energy for the skin cells.

The proteins and nutritional compounds contained in AMINO GLYCO KVIAR PF will be used by the skin cells in their restoration processes.

The skin finds in AMINO GLYCO KVIAR PF a strong ally to fight against its aggressions; helping to restore the natural elements necessary for a luminous, soft and smooth skin.
